Technical data sheet

ANRIN DRAIN Reinforced edge channels KE-150

Channel drainage for the load classes A 15 to E 600

According to DIN 19580 / EN 1433 "Drainage channels for vehicular and pedestrian areas", these surfaces are as-signed to specific load classes depending on the use. Accordingly, the respective suitable ANRIN reinforced edge system can be selected with the corresponding cover grating.

Product specifications

Product specifications	
Material	Resin concrete
Length	50 cm and 100 cm
Width	21.4 cm
Height	13.0 cm, 22.0 - 32.0 cm
Weight	9.5 - 25.5 kg
Edge type	Steel edge rail, 6 mm edge width; galvanised, stainless steel or cataphoretic dip-coated in black
Nominal width	150 mm
Load class	A15 t o E600*
Slope type	Slope invert 0.5 %, Stepped invert, Constant invert
Joint type	UNILINK®-joint
Fastening	SnapLock fastening

Material properties

Channel / component body	
Polymer concrete	polyester resin-based with mineral aggregates, additives
Compressive strength	≥ 90 N/mm²
Bending tensile strength	≥ 22 N/mm²
Modulus of elasticity	ca. 25 kN/mm²
Density	2,1 – 2,3 g/dm³
Heat resistance	100° C (permanent loading)
Frost resistance	- 50° C
Water penetration depth	0 mm
Water absorption:	0,05 %
Edge protection	
Edge protection	Galvanised steel, stainless steel, profile thickness 6 mm or cataphoretic dip-coated in black
Channel cover	
Rinnenabdeckung	Galvanised steel, V2A stainless steel, GJS cast-iron

Technical data sheet

Reinforced edge channels

Slope types

Area drainage with channel runs is normally made according to 3 different principles. The slope of water surface is achieved by the natural fall of the land. The water flows downwards with the gradient of the water level. A stepped invert is realised by an artificial gradient which is formed by the installation of stepped-height channels and connectors. The high flow rate with self-cleaning effect can be achieved with channels in natural slope.

All slope types can be combined according to hydraulic requirements and topographical conditions.

Stepped invert

Constant invert

Slope invert

Accessories – KE-150 with black cataphoretic dip coated steel edge rail

Artikel Nr.	EAN	Beschreibung		Länge cm	Breite cm	Höhe cm	Gewicht kg
01516000	4026857027003	KE-150 Sump unit with dirt trap bucket		50	21.4	62	54
03206810	4026857012450	Pipe socket DA/OD 160					0.6
03206820	4026857012702	Pipe socket DA/OD 200					0.8
01517000	4026857027072	KE-150 Closed end cap for No.	0-020				1.5
01518100	4026857027089	KE-150 end cap with Pipe socket DA/OD 160 for No.	0				1.5
01518200	4026857027096	KE-150 end cap with Pipe socket DA/OD 160 for No.	010, 0105				1.3
01518300	4026857027102	KE-150 end cap with Pipe socket DA/OD 160 for No.	020, 0205				2.0
03217500	4026857012504	KE-150 Step connector for compensating level differences					0.5

Technical data sheet

ANRIN DRAIN Reinforced edge channels KE-150

Cover gratings – KE-150

Slotted grating HEELGUARD

cast iron (coated in black)
Length: 50 cm, SW 6 mm

Load classes:
D400*

Longitudinal Grating

cast iron GJS (cataphoretic dip coating)
c: 50 cm,
MW 25 x 11 mm

Load classes:
D400*, E600*

Slotted cast iron grating OvalGrip Design

cast iron GJS (cataphoretic dip coating)
Length: 50 cm, SW 12 mm

Load classes:
D400*, E600*

Mesh grating

stainless steel (galvanised)
Length: 50 cm, 100 cm
MW 30 x 10 mm / 20 x 20 mm

Load classes:
C250, D400*

Longitudinal profile grating

stainless steel
Length: 50 cm, 100 cm
SW 5 mm

Load classes:
C250

* Ausnahme: Keine Querentwässerung von stark befahrenen Straßen / SW = Schlitzweite / MW = Maschenweite

Technical data sheet

ANRIN DRAIN Reinforced edge channels

Example installations

The following installation guidelines are schematic representations. These are provided as examples and are non-binding. The information provided here is based on our long-term experience in excavation and road construction as well as the state-of-the-art technology. Despite this, designers and planners are always obligated to check the products and the installation instructions for their appropriateness. The example details are simplified recommendations for execution. Constructions are to be re-created on a project-specific basis.

Important: Insert gratings for the installation.

Load class **A 15**

Road concrete and / or concrete sheets or paving bed

Cast asphalt

Load class **B125**

Road concrete and / or concrete sheets or paving bed

Cast asphalt

- 1 In-situ road concrete
- 2 Base course
- 3 Concrete cladding of the channel body B 25
Concrete class C12/15 (A 15 – C 250)
Concrete class C12/25 (D 400 – E 600)
- 4 Foundation, mature soil
- 5 Prefabricated concrete sheets and / or stone systems

- 6 Paving bed
- 7 Wearing course
- 8 Bonding course
- 9 Bitumen base course

All length specifications in millimetres

Technical data sheet

ANRIN DRAIN Reinforced edge channels

Load class **C250**

Road concrete and / or concrete sheets or paving bed

Cast asphalt

Load class **D400* - E600*** (Exception: Cross-road drainage of busy roads)

Road concrete and / or concrete sheets or paving bed

Cast asphalt

- 1 In-situ road concrete
- 2 Base course
- 3 Concrete cladding of the channel body B 25
Concrete class C12/15 (A 15 – C 250)
Concrete class C12/25 (D 400 – E 600)
- 4 Foundation, mature soil
- 5 Prefabricated concrete sheets and / or stone systems

- 6 Paving bed
- 7 Wearing course
- 8 Bonding course
- 9 Bitumen base course

All length specifications in millimetres

Guidelines and regulations

- DIN EN 1433 "Drainage channels for vehicular and pedestrian areas"
- DIN 19580 "Drainage channels for vehicular and pedestrian areas ..."
- RStO "Guidelines for the standardisation of the superstructure of vehicular areas"
- DIN EN 206-1 "Concrete. Specification, performance, production and conformity"
- DIN EN 1045-2 "Concrete, reinforced and prestressed concrete structures.
Part 2: Concrete – Specification, properties, production and conformity;
Application rules for DIN EN 206-1"
